

CLEAN HANDS *DIRTY HANDS.*

Oil Industry Vocabulary Training App

Pitch deck / April 2026

Six aesthetic directions. One app. Your call.

The bottom of the slide features four horizontal stripes of varying widths and colors: dark brown, medium brown, light brown, and yellow.

THE OPPORTUNITY

A training-sized gap in the patch.

450K

U.S. oil & gas workers

Blue collar (roughnecks, drillers, pumpers, derrickhands) AND white collar (landmen, engineers, geologists, traders).

BLS / IOGCC / 2025

THE CURRENT MARKET

Training exists. Gamified training at the breadth we need does not.

PetroSkills	Classroom + online. 60+ yrs. Expensive, dry, cert-focused.
IADC	Well-control & H2S certifications. Compliance checkbox.
Rigzone Glossary	Reference-only. No narrative, no progression.
SLB Energy Glossary	4,600+ terms. Authoritative. Zero gameplay.
LearnToDrill	Closest competitor. Well-control simulator. Narrow scope.

THE HANDOFF PACKAGE

Chuck shipped a working prototype suite.

Eight React prototypes, one weekend session. Curriculum + mechanics + economy, ready to port.

LEARN

5 VOCAB GAMES

Flashcards, multiple choice, typing, speed round, searchable glossary.

CASINO

3 CARD GAMES

Blackjack, Higher/Lower with streak multiplier, Wildcatter push-your-luck (drill deeper, bigger blowout risk).

EMPIRE

8-BUILDING CHAIN

Dirt Patch / Derrick / Cased Well / BOP Stack / Christmas Tree / Pipeline / Refinery / FPSO. Passive income ticks per second.

WORLD SIM

3 LIVE EVENTS

Walkable NPC world. Well Kick, Gas Show, Stuck Pipe trigger vocab-gated responses. Day/night cycle.

8

REACT PROTOTYPES

30

VOCAB TERMS (STARTER)

21

SKILL-TREE NODES

1

SHARED WALLET

THE CORE LOOP

Learn, earn, gamble, build, repeat.

The economy is self-sealing.

Gamble too hard and you run out of Barrels. The only way back in is more vocabulary. Every spent coin is a learning opportunity the player chose. Chuck's flagship oilfield-empire.jsx already implements a shared wallet across all three layers.

THE FRAMING

Not real oilfield slang. Insiders get it instantly.

DIRTY HANDS

Field / Rig / Physical

- Roughnecks, derrickhands, drillers
- Mudloggers and wireline operators
- Toolpushers and company men
- Casing and completion crews

"You office guys don't know what real work is."

CLEAN HANDS

Office / Engineering / Management

- Petroleum, reservoir, completion engineers
- Landmen, royalty owners, division-order analysts
- Geoscientists and reservoir modelers
- Traders, schedulers, hedgers, contract managers

"Field crews don't understand the business."

Players pick at onboarding. The world is shared. Content, NPCs, and event flavor tint by role.

THE VALUE CHAIN

Upstream / Midstream / Downstream.

Every term the app teaches lives in one of these three segments. The curriculum structure mirrors how workers already think about the industry.

UPSTREAM

Find it. Drill it. Lift it.

KEY TERMS

Derrick · BOP · Mud pump
Wildcat · Spud · Kick
Completion · Frac · Perf
Reservoir · Porosity · OOIP

SAMPLE EVENTS

Well Kick → BOP actuation
Stuck Pipe → Fishing

MIDSTREAM

Move it. Store it. Process it.

KEY TERMS

Gathering line · Transmission
LACT unit · Pig · Meter
Compressor station · Scrubber
Dew point · Line pack · BS&W

SAMPLE EVENTS

Hydrate formation → Glycol
Pig stuck → Launcher

DOWNSTREAM

Refine it. Blend it. Sell it.

KEY TERMS

ADU · FCC · Hydrocracker
Reformer · Alkylation · Coker
Octane · RVP · ULSD
Crack spread · WTI · Brent

SAMPLE EVENTS

Unit turnaround → Schedule
Crack spread collapse

THE CURRICULUM

About 200 terms. Tiered beginner to advanced.

~200

TERMS TARGET

Chuck's 30 is the starter vocab. We 6x the pool from SLB Energy Glossary, Latham & Watkins Book of Jargon, and OSHA eTool.

SLB / LATHAM & WATKINS / OSHA

RIG ANATOMY derrick, kelly, drawworks	DRILLING OPS tripping, spudding, circulating	COMPLETIONS frac, perforating, workover
GEOLOGY anticline, porosity, OOIP	MIDSTREAM LACT, pig, compressor	DOWNSTREAM crack spread, coker, reformer
BUSINESS AFE, JOA, NRI vs WI	SAFETY / REGS H2S, BOP, LOTO, PPE	SLANG worm, weevil, bubba, doghouse

DIRTY HANDS EVENTS

15 field emergencies the player resolves.

Each emergency teaches 3-5 vocabulary terms in dramatic context. Pressure, consequence, and the rig doesn't wait.

WELL KICK BOP, shut-in pressure, ECD	BLOWOUT Shear ram, evacuation, kill well	LOST CIRCULATION Fracture pressure, loss pill	STUCK PIPE Differential sticking, spotting fluid	TWIST-OFF Fish, overshot, spear, jarring
SWAB KICK Trip speed, pit volume	H2S RELEASE SCBA, escape pack, downwind	GAS-CUT MUD Separator, shale shaker, gas migration	PIPE COLLAPSE Burst pressure, sidetrack	SURGE PRESSURE ESD, fracture gradient
WIRELINE PARTED Coiled tubing, slickline recovery	LOST HOLE Shale stability, slough, open hole	DOWNHOLE TOOL FAIL MWD, packer reset	CASING BURST Cement squeeze, remediation	CUTTINGS FLOOD ROP, annular velocity, wiper trip

CLEAN HANDS EVENTS

12 business emergencies the player negotiates.

Title clouds, overruns, lawsuits, price crashes. No gore, but the stakes are seven figures.

TITLE DISPUTE Mineral rights, curative work, insurance	FRAC-HIT LAWSUIT Trespass, offset well, damages	ROYALTY DISPUTE NRI, deductions, lease language	SURFACE vs MINERAL Easement, ROW, use agreement
AFE OVERRUN JOA, non-op consent, scope	OIL PRICE CRASH WTI, NPV, breakeven, defer	CONTRACT LIEN Invoice, payment terms, mediation	ENVIRONMENTAL VIOLATION EPA, remediation, reportable
LEASE EXPIRATION Primary term, extension, farmout	JV DEADLOCK Voting, arbitration, buy-out	DUE DILIGENCE MISS Disclosure, earn-out, indemnity	HEDGING LOSS Forward contract, margin call, counterparty

TECH & DISTRIBUTION

React Native + Expo. Private channels only.

THE STACK

React Native + Expo

One JavaScript/TypeScript codebase. iOS and Android from the same commit. Chuck's existing React 18 prototypes port cleanly — no Swift or Kotlin rewrite.

UI	React Native core + Reanimated
Animation	Rive (pump jacks, transitions)
State	Zustand or Redux Toolkit
Storage	MMKV (encrypted key-value)
Build	Expo Application Services (EAS)

HOW IT SHIPS

Private. Employees only.

No App Store, no Google Play. Distributed to Quintilian staff via internal testing channels and MDM — fewer review cycles, no 30% tax, full control over content.

iOS	TestFlight internal group (up to 100 testers)
iOS alt	Ad-hoc IPA + Apple Business Manager
Android	Direct APK install or MDM push
Android alt	Play Store private track (internal only)

LOCKED DECISIONS

These are settled. The aesthetic is the open one.

PLATFORM

React Native + Expo

iOS + Android, single codebase

ROLE SYSTEM

Shared world, tinted

One village. Role tints vocab + NPCs + events.

CURRENCY

Barrels (bbl)

Replaces Chuck's honeycomb coin glyph everywhere.

DISTRIBUTION

Private

TestFlight internal, MDM, direct APK. No App Store.

Everything else on the table — aesthetic, casino card mix, onboarding length, role-picker UX — is open and decided from here on.

SIX DIRECTIONS

Pick one. Or blend two. The next six slides each go deep.

Each direction is a commitment to a visual language, a typographic pairing, a tone of voice, and a character style.

01 / 06

RECOMMENDED

West Texas Sunset

Warm isometric. Insider-authentic.

AESTHETIC 01 OF 06

RECOMMENDED

WEST TEXAS SUNSET

"Looks like the sunset they drive home in."

PALETTE

#E07060 #D2B48C #B7410E #FFD700 #6B8E23 #3D3D3D

TYPOGRAPHY

Alfa Slab One / Barlow Condensed

CHARACTER & WORLD

Realistic roughneck avatar, customizable (beard, skin tone, hardhat, FRC). Isometric golden-hour oilfield; pump jacks and derricks silhouetted against painterly sunset.

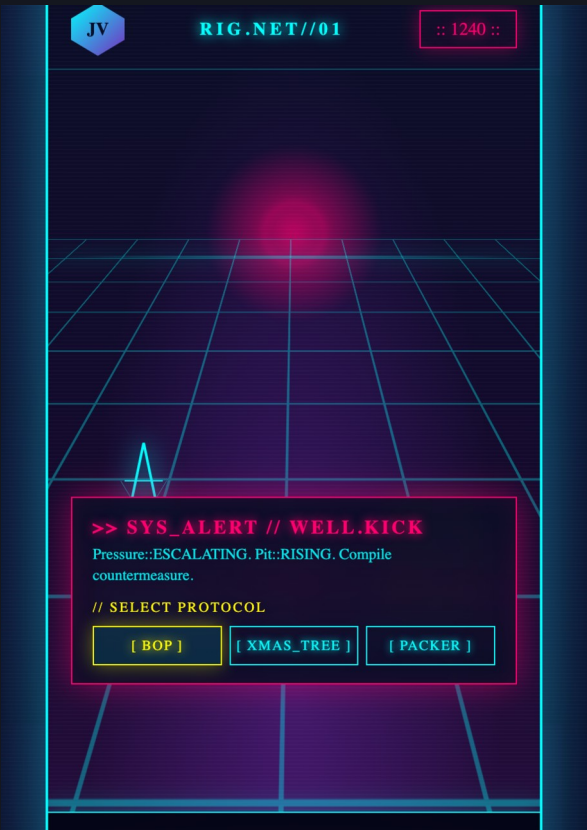

WHY IT FITS THE AUDIENCE

This is what the Permian looks like at 6pm. Insider-authentic. No condescension. The palette and typography signal competence, not cuteness.

AESTHETIC 02 OF 06

NEON INDUSTRIAL

"Tron meets the night shift."

PALETTE

#00FFFF #FF006E #7B2CBF #0A0E27 #FFFF00 #2F4F4F

TYPOGRAPHY

Orbitron / Share Tech Mono

CHARACTER & WORLD

Silhouette-only character with glowing hardhat. Cyberpunk wireframe rigs on a neon grid. Flat front-view with dramatic glow and scanlines.

WHY IT FITS THE AUDIENCE

Tech-forward guys and millennials on the rigs grew up on Tron and arcade cabinets. Photographs beautifully for the pitch deck — immediately memorable. Polarizing.

AESTHETIC 03 OF 06

SATURDAY MORNING DERRICKS

"He-Man energy at the pump jack."

PALETTE

#FF8C00 #0066CC #76B947 #FFD700 #663399 #87CEEB

TYPOGRAPHY

Bangers / Nunito

CHARACTER & WORLD

Chibi-lite mascots with big eyes and thick ink outlines. Pump jacks and tanks have personalities — the field itself is alive. Comic-book speech bubbles.

WHY IT FITS THE AUDIENCE

Men 30–50 grew up on Transformers, TMNT, and He-Man. Warm and welcoming after a brutal 12-hour shift. Playful, not juvenile.

AESTHETIC 04 OF 06

RETRO PIXEL BOOM

"SimCity 2000 meets the oil patch."

PALETTE

#D25020 #808080 #654321 #00A000 #FFFF00 #0000AA

TYPOGRAPHY

Press Start 2P / VT323

CHARACTER & WORLD

16-bit sprite roughneck, 3/4 facing stance. Chunky pixel art. Text scrolls, menu beeps, blowouts are pixelated mushroom clouds.

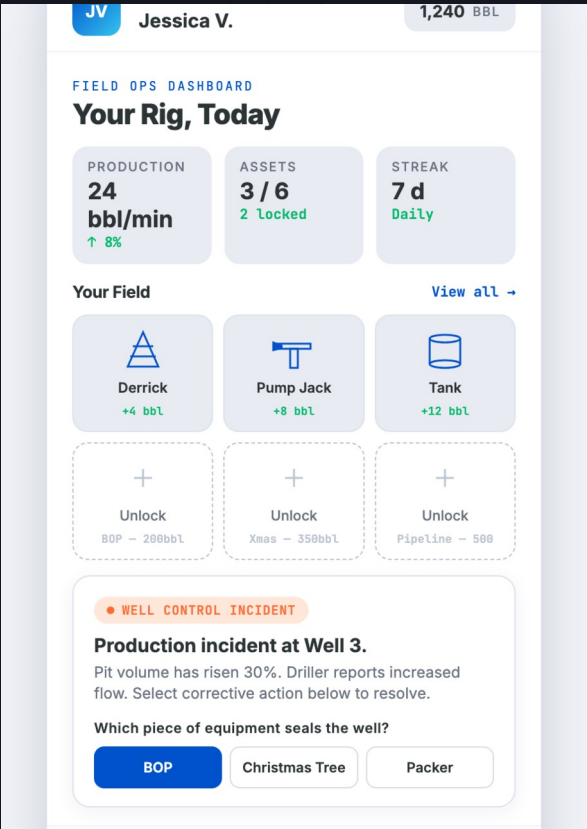

WHY IT FITS THE AUDIENCE

Gen-X men on the rigs spent childhoods on this palette. Also: pixel art stays readable on cracked phone screens in bad light — which is the real use case.

AESTHETIC 05 OF 06

SLEEK CORPORATE VECTOR

"If Halliburton's LMS got a Figma redesign."

PALETTE

#0052CC #36C5F0 #FF6B35 #E8ECF2 #2D3436 #FFFFFF

TYPOGRAPHY

Inter / JetBrains Mono

CHARACTER & WORLD

Minimal SVG silhouette or initials-based avatar. Flat top-down grid with geometric icons. Looks like a modern SaaS dashboard.

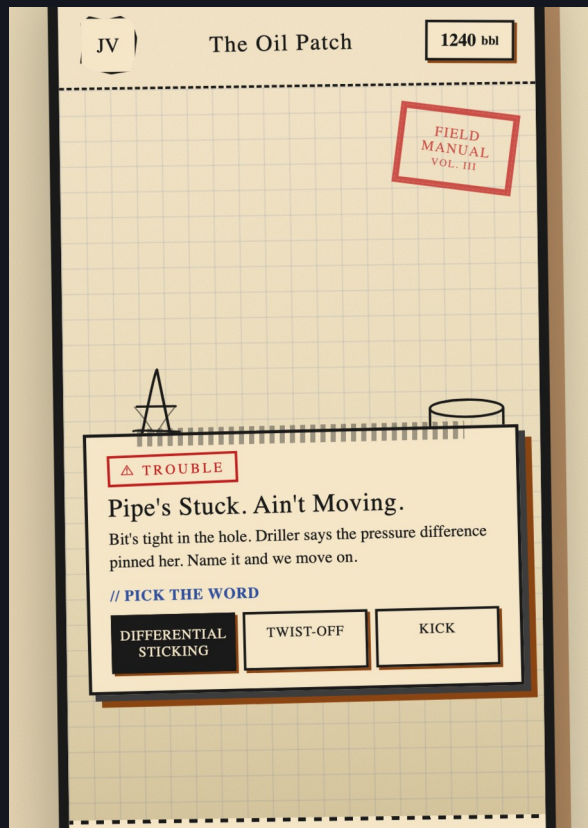

WHY IT FITS THE AUDIENCE

Guys skeptical of "games on the phone" will engage because it reads as real work software. Best for enterprise-grade buy-in and foremen who distrust gamification.

AESTHETIC 06 OF 06

ROUGH CUTOUT COLLAGE

"A grease-stained 1974 manual that learned to gamble."

PALETTE

#F5E6C8 #1A1A1A #8B4513 #3D3D3D #C02020 #2F4F9F

TYPOGRAPHY

Rye / Special Elite

CHARACTER & WORLD

Ink-and-pencil hardhat guy, 1970s training-manual aesthetic. Every asset labeled like a diagram: fig. 1 — derrick. Tactile, artisanal.

WHY IT FITS THE AUDIENCE

Tactile, artisanal, unmistakably handmade. Stands out from every other mobile app these men have used. Appeals to men who respect tools, manuals, and the old way of doing things.

BLEND EXPLORATION

#1 had the soul. #5 had the structure.

The 6 directions gave us two finalists: #1's warmth and palette, #5's corporate professionalism. #5 alone felt too sterile. We blended them four ways.

#1

West Texas Sunset

PALETTE · WARMTH · SLAB SERIFS · OILFIELD SOUL

+

#5

Sleek Corporate Vector

LAYOUT · DATA HIERARCHY · INTER · TOOL-CREDIBILITY

= 4 BLENDS

BLEND A

Permian Ops

Dark SaaS in sunset tones.

BLEND B

Field Report

Cream paper, ink stamps.

BLEND C

Sunset SaaS

Modern 2026. Warm, not cold.

BLEND D

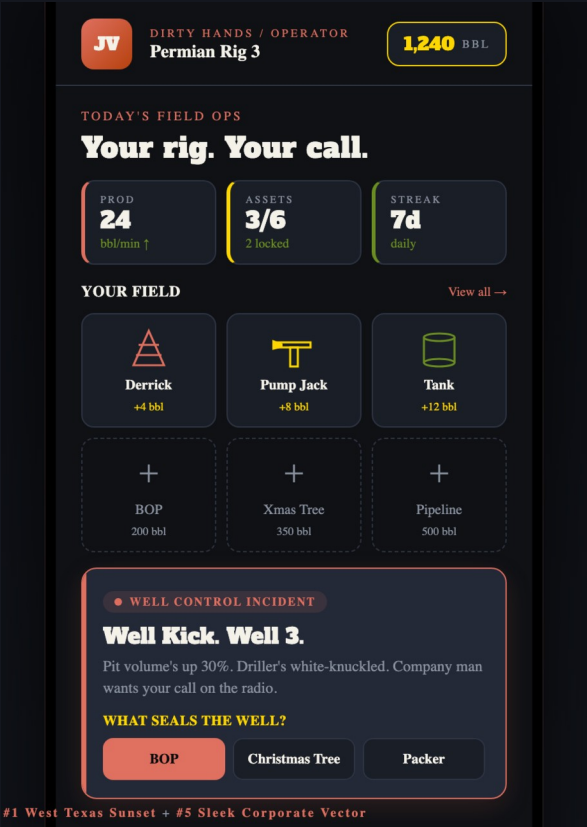

Derrick Dashboard

Rig scene hero + SaaS below.

BLEND A OF 04 // 1 + 5

PERMIAN OPS

"Dark SaaS in sunset tones."

THE MIX

From #1: sunset palette, slab-serif hero numbers, roughneck voice. From #5: dashboard layout, metric cards, clean Inter body, data hierarchy.

PALETTE

#0F1115 #E07060 #FFD700 #B7410E #6B8E23 #F5F2EA

TYPOGRAPHY

Alfa Slab One (hero nums) + Inter (everything else)

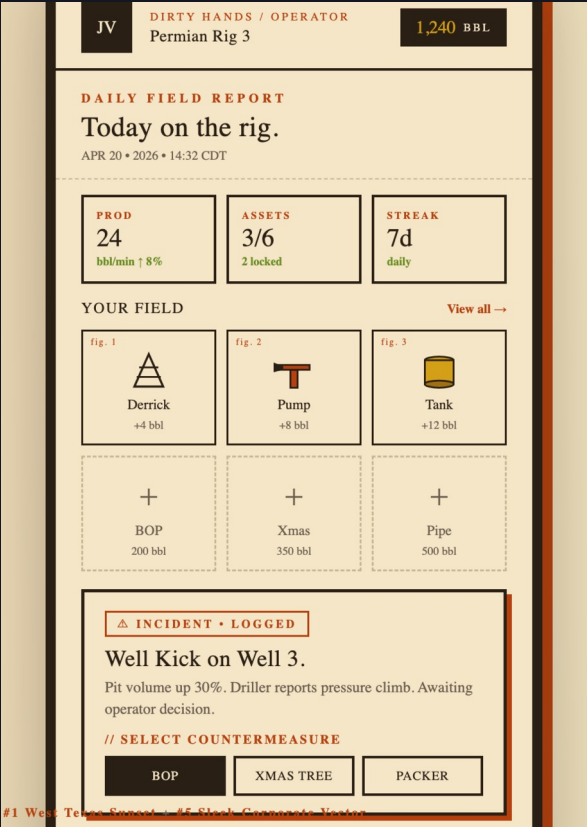

WHY IT FITS

Feels like a real operator tool, not a game. Dark mode reads in bright Texas sun. Company men trust the layout; field hands trust the voice.

BLEND B OF 04 // 1 + 5

FIELD REPORT

"Company memo meets the oilfield."

THE MIX

From #1: slab-serif titles, rust/gold earth-tone palette, warm paper background, ink-stamp feel. From #5: clean data tables, metric cards, Inter body text, "fig. 1" captioning from corporate docs.

PALETTE

#F5E6C8 #2A1F14 #B7410E #D4A017 #6B8E23 #D2B48C

TYPOGRAPHY

Alfa Slab One (titles) + Inter (body)

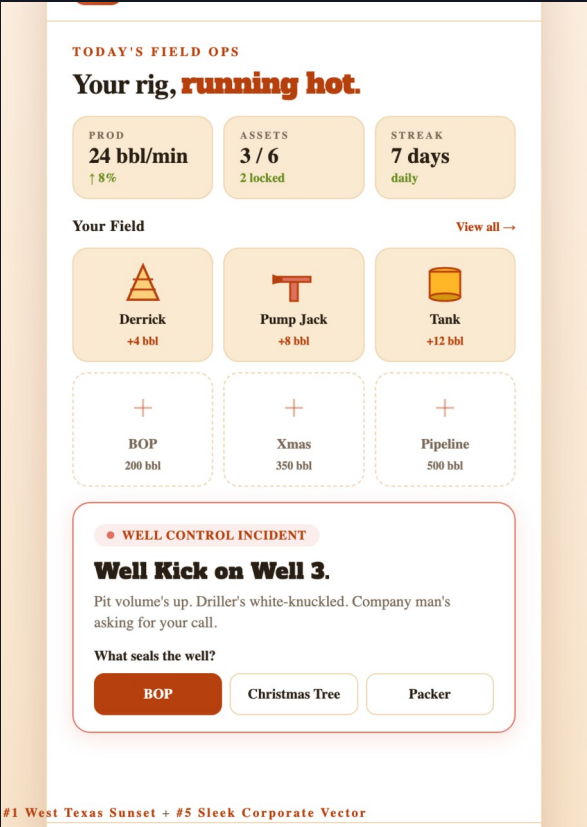

WHY IT FITS

Best of both worlds for a company man: looks like a report he'd file. Warm palette keeps it from feeling like SAP. Prints beautifully when workers screenshot and share.

BLEND C OF 04 // 1 + 5

SUNSET SAAS

"#5's layout. #1's soul."

THE MIX

From #1: sunset warmth throughout — cream background, rust CTAs, gold highlights, Alfa Slab on punch lines.
From #5: Inter for 95% of the UI, metric cards, rounded geometry, modern SaaS shadows, light-mode legibility.

PALETTE

TYPOGRAPHY

Inter (primary) + Alfa Slab One (punch words only)

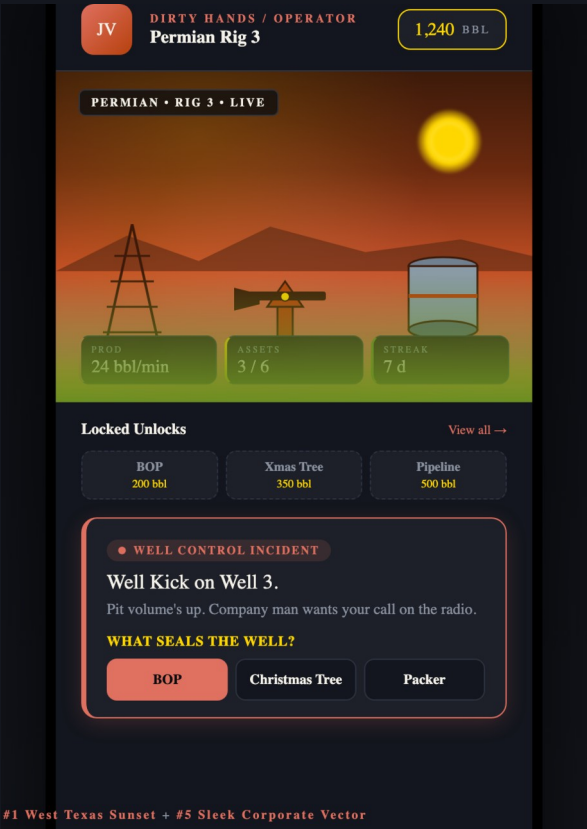

WHY IT FITS

Reads as a 2026 product. Younger engineers expect this from Slack, Linear, Notion — and the sunset warmth makes it still feel like oil country. Bright enough for outdoor reading.

BLEND D OF 04 // 1 + 5

DERRICK DASHBOARD

"Hero rig scene + SaaS bones underneath."

THE MIX

From #1: full sunset-gradient rig scene as hero — real derricks and pump jacks silhouetted against golden hour. Emotional hook up top. **From #5:** scene labeled with clean data overlays ("Permian • Rig 3 • Live"), metric pills, structured cards below.

PALETTE

#13161E #E07060 #FFD700 #B7410E #FFB627 #6B8E23

TYPOGRAPHY

Alfa Slab One (stats, event titles) + Inter (everything else)

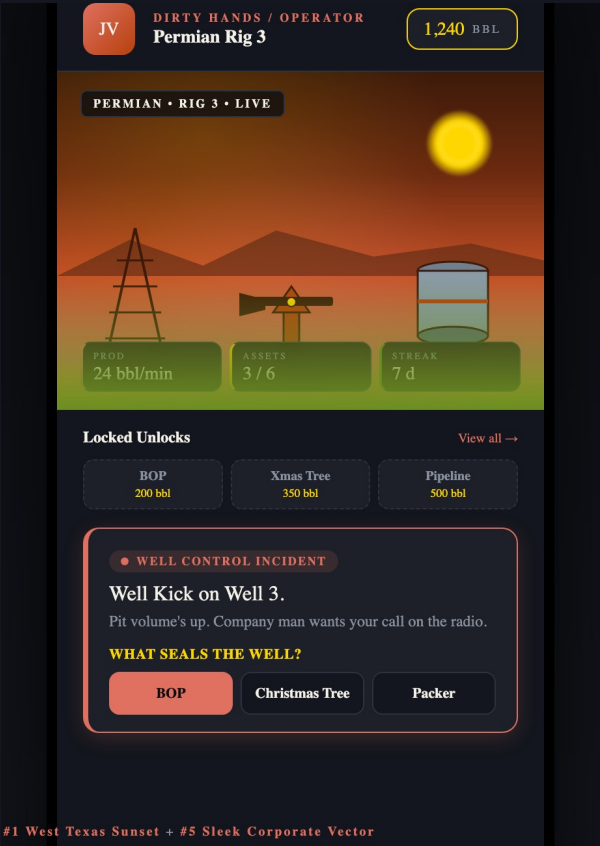

WHY IT FITS

For men who love the patch, this is the one that **shows** the patch. Most visually distinct of the four. Keeps #1's emotional warmth with #5's tool-credibility.

RECOMMENDATION

RECOMMENDED

#1 is still home. Blend D is the bridge.

THE CALL

#1 for the palette. Blend D for the delivery.

West Texas Sunset's colors and voice won the 6-way round. Blend D keeps that emotional hook (the rig scene at sunset) and adds operator-grade data structure beneath it — which gets past foremen and engineers who distrust "games."

BACKUP PICKS

Blend C (Sunset SaaS) or pure #1 West Texas Sunset

If you want lighter/modern: Blend C. If you want fully emotional, no dashboard: pure #1.

NEXT STEPS

Once the direction is locked.

01**Port Chuck's prototypes**

Lift the 8 React 18 prototypes into React Native + Expo. Keep the shared-wallet economy intact. Convert inline CSS to StyleSheet. Add MMKV persistence so refresh no longer wipes progress.

02**Build the shared world + tint layer**

Single village map. Role pick at onboarding determines starting vocab bucket, first NPCs met (Toolpusher Buck vs. Company Man Carl), and the flavor copy on events. Unlocks both tracks long-term.

03**Expand curriculum to ~200 terms**

6x Chuck's starter pool. Tier beginner → advanced. Source from SLB Energy Glossary, Latham & Watkins Book of Jargon, OSHA eTool. Build the 15 field + 12 business events as live content.

04**Private beta to Quintilian employees**

TestFlight internal + direct APK. Small cohort (10–20 workers across Clean and Dirty roles). Tune difficulty, vocab depth, tone, and event pacing before wider rollout.
