C O N T E X T

Portland Property Management

at a glance — what we're working with, before we propose changes.

Family-owned, founded around 2012. Small team running ~325 doors across single-family homes, condos, duplexes, and multiplexes — managed inside AppFolio with tenant and owner portals already live.

Coverage: Greater Portland Metro — Pearl, Downtown, NE / SE, Beaverton, Hillsboro, Tigard, Tualatin.

DOORS UNDER MANAGEMENT

325

units

TEAM SIZE

1 – 10

people

SYSTEM OF RECORD

AppFolio

PMS + portals

ADVERTISED HOURS

M – F

9 – 5, no after-hours

SECTION 01

The Wedge

Where the gap is hiding in plain sight.

The rating gap is the whole story

Google rating, PPM vs. top Portland competitors.

PPM

3.0

Across 40+ Google reviews — a full 1.2 – 1.7 stars below the competitive band.

Source: Google Business listings, top Portland PM competitors.

Every competitor pitch is identical

And not one of them is PPM.

“24/7 live phone. No voicemail. Fast maintenance.”

— every top Portland PM website. PPM advertises M–F, 9–5.

TENANT SATISFACTION

After-hours calls go to voicemail. Every miss feeds the next 1-star review.

OWNER RETENTION

Owners hear from tenants about delays before they hear from PPM. Trust erodes silently.

REVIEW VELOCITY

No moment-of-resolution prompt = no offset to the noise that already exists on the listing.

SECTION 02

The Recommendation

Voice + SMS + chat agent that answers every tenant inquiry around the clock, triages maintenance, writes work orders into AppFolio, and asks for a Google review at the moment of peak satisfaction.

Sits on top of the existing PMS. Nothing rips out.

C A P A B I L I T I E S

What it does on day one

Six functions, all running from the moment the after-hours number flips.

01

24/7 intake

Every after-hours call, text, or portal message — answered. Captures unit, location, symptoms, photos, and access notes.

02

Smart triage

Rule-based emergency detection — gas, flood, no heat, electrical — for instant vendor dispatch. Routine items scheduled, not panic-dispatched.

03

DIY troubleshoot

Walks tenants through safe self-fixes — tripped breaker, disposal reset, thermostat — before rolling a truck.

04

AppFolio write-back

Creates and updates work orders inside AppFolio automatically. No double-entry. PMS stays the source of truth.

05

Status nudges

Proactive updates to tenants and owners. Kills the “what’s the status?” follow-up calls before they happen.

06

Review driver

After every successful resolution, asks for a Google review at the moment of peak satisfaction — the lever that moves the 3.0.

ARCHITECTURE

Build stack

Composable, swappable, no proprietary lock-in.

	PMS	AppFolio	Existing — system of record
	VOICE	Twilio + Vapi / Retell	Phone and SMS rails
	LLM	Claude	Primary, with GPT-4-class fallback
	ORCHESTRATION	Make.com or n8n	Workflow + AppFolio API
	ALERTING	Telegram / SMS	On-call human escalation
	REVIEW LOOP	Google Business API	Post-resolution SMS prompt

WHY NOW

Industry signals

What the data already says about AI triage in property management.

~40%

**OF “EMERGENCIES” AREN'T
EMERGENCIES**

AI triage catches the misclassifications before a truck rolls.

–30%

**FEWER UNNECESSARY
DISPATCHES**

Achievable with AI-driven triage, per published industry benchmarks.

+28%

LIFT IN TENANT SATISFACTION

From after-hours AI coverage replacing voicemail and missed calls.

31 / 12

% PORTFOLIO GROWTH, 2026

AI-adopters vs. non-adopters, per the AppFolio 2026 Benchmark.

EXECUTION

30-day rollout path

From kickoff to portfolio decision in four phases.

1

DAYS 1 – 7

Discovery + AppFolio API access

Pull 90 days of maintenance tickets and call logs. Categorize by type, urgency, and after-hours volume. Set baseline KPIs.

2

DAYS 8 – 17

Pilot on 1 building or 25 units

Stand up voice + SMS intake. Wire AppFolio work-order creation. Configure emergency triage rules. Lock the vendor dispatch list.

3

DAYS 18 – 25

Tenant rollout + review loop

Switch the after-hours number to the AI agent. Activate the post-resolution Google review request. Daily owner digest auto-generated.

4

DAYS 26 – 30

Measure + decide on rollout

Compare KPIs vs. baseline. Targets: 30%+ drop in unnecessary dispatches, 50%+ drop in first-response time, first new 5-star reviews logged.

DAY 30 • 30%+ fewer dispatches • 50%+ faster first response • first new 5-star reviews logged.

Why this one first

Of every AI initiative on the table, this one earns the right to go next.

Closes the biggest commercial gap

The 3.0 rating is the single most visible weakness on every prospect's first Google search. This use case targets it directly.

Measurable wins inside 30 days

Baseline KPIs in week one, pilot deployment by day 17, real after-hours coverage by day 25. Owners see the difference in a month, not a quarter.

Layers cleanly on AppFolio

Nothing rips out. AppFolio stays the system of record. Tenant and owner portals stay where they are. Risk envelope is small.

Creates the data foundation for the rest

Once intake, triage, and write-back are flowing, leasing, owner reporting, lease abstraction, and renewals all have clean rails to run on.

T H E N E X T M O V E

Let's run the 30-day pilot.

One building. Twenty-five units. Real after-hours coverage by day 25. Real review velocity by day 30. From there, the portfolio decision is data, not a leap of faith.
